4. The System of International Affairs

4.1 International Affairs page on MCT website

At first there is not the main platform to promote, update and advertise the international activities of Faculty of Mass Communication Technology. Therefore, we created the International Affair page on MCT website for those reasons. Moreover, it can be the source to collect the international activities of MCT.

The main contents which contain the page are

1. The list of international agreements of MCT.

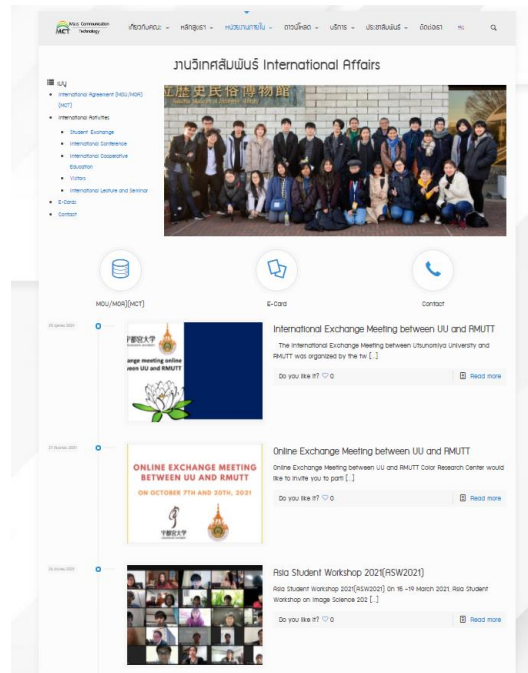

There is the name of universities, contact person, and the contact of coordinator in each university. Also, people can see and download the agreements.

2. International activities

This part shown the international activities of MCT. It is divided into 5 types of activities; 1. student exchange, 2. international conference, 3. international cooperative education (training), 4. international lecture, and 5. visitors.

3. News

Every international activity, both happened and will be happened in the future, will be updated in international page.

This is the manual system which contained the data of international affairs. The international activities or related data will be recorded in this file such as list of students who participated in international activity, activity details, or international agreements etc. The data is categorized sheet by sheet for the convenience of viewer and collector.

International Affairs attempted to compile the previous data. Also, we recorded every activity happened in this year. It is so advantage to report international activities to The International Strategy Division (ISD) and Planning Division of RMUTT.

5. Conclusion

During 2021, there are several activities have done by International Affairs even though the COVID-19 situation is still not better.

We have 3 online international activities with 3 universities we have agreement. It can be said that the online activities can active the agreements of international universities. Moreover, many students, lecturers, and researchers of the faculty participated in the activities, and they go the experience with international activities such as oral presentation, and workshop. There was the exchange of knowledge between universities which will be advantages for them from now and in the future.

Also, there are 2 international agreements have done in this year. First, we have extended the agreement of Hokkaido Information University or HIU, Japan. Second, we have started the new agreement with Kyushu University, Japan. This is such as great opportunity for MCT where we can cooperation with one of high potential universities in Japan. We can exchange students and staffs in the future.

International Affairs have created the system for collecting data such as activities, student lists, agreements, or anything related with the international affairs. Since, there is no record of international information of MCT. That made we faced with the problem that we couldn't find the previous information of activities or related data. Therefore, creating this system is so beneficial for the officer. Now, every activity in the present and in the past which can be found is recorded into the system. Also, we created international page in MCT website to advertise and promote the international activities. There are the activities and significant information updated in the page.

These are the work international affairs has done in 2021. We will try our best to promote and develop the international activities of the faculty.
